

EXP 1 : GREATEST OF THREE NUMBERS

AIM :

To execute the greatest of three numbers using raptor.

Output :

Result :

Thus the program for greatest of three numbers are executed successfully .

EXP 2 : ARMSTRONG NUMBER

AIM :

The program to execute the Armstrong number .

OUTPUT :

EXP 3 : FACTORIAL

AIM :

The aim is to execute the factorial

OUTPUT :

Result :

Thus the program to execute the program for factorial was executed successfully .

EXP 4 : NUMBER OF CHARACTERS IN A STRING

AIM :

To execute the program for number of characters in a string .

OUTPUT :

The screenshot displays the RAPTOR IDE interface. The top menu bar includes File, Edit, Run, Generate, and Help. Below the menu is a toolbar with various icons for file operations and execution. The main workspace is divided into three sections: Symbols, Main, and a console window.

Symbols: A list of symbols used in the flowchart, including Start, Assignment, Call, Input, Output, Selection, and Loop. Below this list, the variable `STR` is defined as `"rakshi"` and the variable `COUNT` is defined as `6`.

Main: The flowchart logic is shown. It starts with a **Start** terminal, followed by an **Input** symbol: `"Enter a string" GET STR`. This is followed by an **Assignment** symbol: `COUNT ← length_of(STR)`. Then, an **Output** symbol: `PUT "Total no of characters=" + COUNT`. The flowchart ends with an **End** terminal.

Console: The RAPTOR MasterConsole window shows the output of the program: `Total no of characters=6` and `--- Run Complete! 5 Symbols Evaluated ---`. A **Clear** button is visible at the bottom of the console.

The Windows taskbar at the bottom shows the system clock as 13:58 on 20-07-2026, along with various system icons and the Windows logo.

RESULT :

Thus the program to execute the number of characters in a string was executed successfully .

EXP 5 : LEXICOGRAPHICALLY SMALLEST STRING

AIM :

The aim is to execute the program for lexicographically smallest string .

OUTPUT :

RESULT :

Thus the program to execute the lexicographically smallest string was executed successfully .

EXP 6 : CYCLOMATIC COMPLEXITY

AIM :

The aim is to execute the program for cyclomatic complexity .

OUTPUT :

RESULT :

Thus the program for cyclomatic complexity was executed successfully .
